PROFESSIONAL SUMMARY

Front-end developer with a background in IT and technical support, building fast, accessible web apps in JavaScript and expanding into TypeScript, React and Next.js. Built and deployed a Next.js and TypeScript tool that audits Core Web Vitals through the PageSpeed Insights API, plus a vanilla JavaScript analytics dashboard. Seeking remote front-end roles; open to Dallas-area hybrid or in-office.

SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), accessibility, Core Web Vitals

Currently building with: TypeScript, React, Next.js (App Router), Tailwind CSS, Zod

Tools & Deployment: Git, GitHub, Netlify, Vercel, REST APIs

FEATURED PROJECTS

Core Web Vitals Engine | Next.js, TypeScript, OpenAI API | Live Demo | GitHub

- Built and deployed a Next.js and TypeScript tool that audits a public URL: runs PageSpeed Insights and an HTML crawl in parallel, and reports lab and field LCP, CLS and INP plus the LCP element.
- Added an on-demand OpenAI step that generates up to 8 HTML fixes, with per-IP rate limiting and validation that rejects private hosts to guard against server-side request forgery.

Libro Book Search | React, TypeScript, Vite, Open Library API | Live Demo | GitHub

- Built and deployed a book search app on the Open Library API: debounced search (400 ms, 3-character minimum) shows up to 10 results with title, authors, first-publication year and cover.
- Modeled request state as a discriminated union, cancelled stale requests with AbortController, and wrote a typed fetchJson<T> helper that checks response.ok.

PitchPulse Analytics | JavaScript (ES modules), Chart.js, REST API | Live Demo | GitHub

- Built a vanilla JavaScript sports dashboard that charts live API data with Chart.js (95/100 Lighthouse performance), with localStorage-persisted filters and GA4/GTM tracking of 15+ events.

EXPERIENCE

Independent Study & Projects | Oct 2026 - Present

- Following a structured 12-week curriculum in TypeScript, React and Next.js (about 4 focused hours a day) and building the projects above.

Account Security & Claims, Truist Bank | Arlington, TX | Jan 2026 - Oct 2026

- Resolved complex account-security and fraud-claim escalations, turning dense financial findings into clear next steps for customers.

Customer Service Rep, Verizon | Remote | Mar 2025 - Nov 2025

- Diagnosed and resolved complex service interruptions for consumer customers using remote desktop (RDP) tools and ticketing systems.

EDUCATION

Fullstack Academy | Web Development Bootcamp Graduate (2022)

Certifications: Google Analytics 4 (GA4) / Google Tag Manager Foundations
